

Tempest 3 (T3) Yamaha GP1300R Race Ignition

Advent Ignitions, Inc. now offers an Ignition for the Yamaha GP1300R. This Ignition is designed to utilize all stock engine parts including flywheel and trigger pickups. No other company offers an ignition designed specifically for the GP1300R engine. This means that you don't have to remove the engine and replace hundreds of dollars worth of flywheel, trigger pickups, coils and other hardware just to be able to use a race ignition.

You can install the Advent T3 GP1300R ignition for far less than half the cost of the big name units. And, installation takes an hour or two, where as the other system can easily take a day or more to get the job done.

The GP1300R T3 ignition is designed for use with carbureted engines only. The ignition can be installed in two ways, wire it into the factory harness or, purchase a piggy back installation kit and it becomes a 'Plug and Go' system installed in 20 minutes without any wiring or soldering required. If your boat has a servo unit installed a separate controller is available from Advent to operate the servo.

This ignition also includes a remote curve selection port. With the optional Remote Switch Box you can change the curve settings when the electrical box is closed.

Features List:

- Fits all model years of the GP1300R
- Operates as charging or total loss
- Four user selectable ignition advance curves*
- Separate timing curve for each cylinder to balance cylinder power output and product more HP
- Supports stock TPS to apply a user programmable retard up to 7° to control "off throttle" detonation
- User adjustable smooth rev limiter from 5900 – 9000 RPM
- Uses stock flywheel, trigger pickups, stator and ignition coils
- Optional Remote Curve Selection Switch available
- Optional pluggable "Quick Install" kit available
- No special tools or adjustments required

*More than 20 curve sets are available to choose from, or develop your own.
